Hardware, Installation & Software

Billing, Support & Maintenance

Installing EV charging is an investment in the future of your business or site.

Using EV ownership data & charging session information, we partner with you to ensure maximum return, by:

- Understanding requirements
- Designing an EVUp Charging Plan
- Recommending OCPP hardware
- Installing to Australian Standards
- Connection to the EVUp network
- Access to charging data via EVUp portal
- Billing via PayPass, App, QR code or RFID
- Handover & support
- Regular maintenance

UpCharge software by EVUp is PCI compliant, e-commerce ready, fully load managed & hosted right here in Australia.

Support Australian and charge happy with the EVUp network. Contact our team for turnkey EV charging solutions.
